

As a privately held company, Xioicom Wireless was founded by Compagnie Financière Richemont AG (Richemont) and Remgro Limited to become the global leading provider of integrated wireless broadband solutions to operators in under-served markets. Xioicom is headquartered in Atlanta, Georgia with international offices in Africa, Europe, Latin America, Australia and Asia.

Xioicom's vision is to utilize the most effective and efficient technology to design, deploy, integrate and manage, purpose-built networks - wireless and wired, licensed and unlicensed – to enable anywhere, anytime access, regardless of access device, to profitable and targeted market segments around the world.

Xioicom utilizes a “build-as-you-grow” model balancing the right mix of people, processes, and performance to drive lower Total Cost of Ownership (TCO) for the operator. We partner with best-in-class providers to train and develop mission critical skills, in market, ensuring a sustainable and cost-effective approach to resourcing the business. This approach enables us build a highly local and be-spoke broadband network which serves the specific market needs.

Xioicom is a solutions-driven company. We offer a wide-range of flexible, market driven solutions and services that substantially increase revenue opportunity and reduce the operator's cost to manage their broadband network. We combine our offerings in support of multiple solutions including: Citywide Mesh, Public Safety, Highway/Railway, Campus, Wireless Backhaul, Fixed Wireless and more...

Xioicom's modularity and high performance wireless networks core allows for convergence of multiple network architectures and technologies including: mesh, point-to-multi-point, point-to-point, and hybrid.

Xioicom's business model is unique because we share in your success. We are actively involved in each network's success and share in the economic returns through joint venture partnerships or managed services arrangements.

Xioicom partnership is a smart decision. Our solutions and services support operators by providing business modeling and planning tools specifically for the broadband wireless access business. As a result, operators dramatically reduce their TCO by protecting every investment from obsolescence as technologies and business needs change. In addition operators are provided with market-based content and solutions that drive incremental revenue opportunities.

Xioicom is a proven business partner, understanding that one-size never fits all:

1. International deployments and a catalog of industry best practices
2. Strategic partnerships with industry leading providers
3. A well-funded company with access to financial and skilled human capital
4. Turnkey solution alternatives to optimize your network environment
